Investment Objective

The Fund aims to provide a growing income stream and to grow capital over the long term (5 years or more). Each part of this objective will have equal weighting.

Investment Philosophy

The fund will be at least 80% invested in global equities. The Investment Manager will invest in a select (typically 20-50 holdings) portfolio of companies that exhibit high and sustainable returns on capital allowing the companies to both reinvest in the business for growth and provide a meaningful and growing dividend stream to be paid over time. In order to maximise the opportunity of identifying such companies, the Fund will invest in listed equities globally. The Manager believes that in order to sustain high returns over the long term, companies must adhere to responsible and sustainable investment principles.

Management Commentary

Active Engagement

As an active equity fund manager with a concentrated portfolio, we aim to act as long-term owners of the companies the fund is invested in. Whilst this involves continual monitoring of the progress of the company in the context of its industry, we also seek to actively engage with the board, management, and other key stakeholders to provide our long-term investment perspective and actively contribute to good governance.

One important example is reviewing and assessing incentives provided in executive management compensation packages. As Charlie Munger said; 'Show me the incentive and I will show you the outcome'. This is not an easy area as objective quantitative measures can easily be manipulated in the short term. Our aim is that management manage their businesses to maximise long term performance through high and sustainable return on capital, asset base growth and achievement of robust sustainability objectives.

Some companies have very differentiated cultures which are best supported with very differentiated compensation structures. Netflix, owned in the portfolio, is an example of this through a focus on recruiting the best talent they can, paying them a high fixed salary, providing a broad visionary 'North Star' mission statement and then giving them bags of discretion as to how to get there. This encourages differentiated thought and experimentation which is vital in a creative business.

In the absence of this, we tend to look for several measures which together provide a balanced structure. Typically, these would include return on invested capital (ROIC), organic revenue growth and cash flow optimisation along with specific ESG measures, all set over multiple year time frames. We do not consider earnings per share growth as appropriate as it is open to manipulation. Nor are we particularly favourably inclined to total shareholder return (TSR or more simply share price performance) as this causes undue focus on the same which can also be at the expense of longer-term progress.

Whilst many firms have now reduced or removed weightings towards EPS and TSR growth, many still do not include ROIC or ESG incentives. Over the past month we have engaged with two portfolio companies: Procter and Gamble and Rentokil Initial, over aspects of their planned future compensation structure. In both cases we expressed our wish that ROIC be added to provide a balanced set of incentives, and this is being fed back to the respective boards.

In the case of Procter and Gamble we also asked for specific ESG incentives to be added representing achievable and effective objectives. The company has been assessed by us strong on sustainability. They set companywide ESG objectives and report on progress and indeed, started this process as early as 2010. However, we consider this will be reinforced and pursued with even more energy if the senior directors are explicitly rewarded for their efforts. Rentokil, credibly, already does incorporate ESG objectives in its incentivisation plans and is a leader in this respect.

Passive managers, who own a vast number of companies and are managed by quant teams unconcerned with investment fundamentals, will not be acting like owners in this manner. Through active funds such as ours, investors can be sure they are positively contributing to better governance and therefore improved sustainability as well as strong investment returns.

The Investment Manager

Michael Crawford successfully managed what grew to be a substantial global equity fund at Bessemer Trust for seven years before departing in January 2019 to found Chawton Global Investors. He has over 23 years of fund management experience and was a member of the highly successful Morgan Grenfell Asset Management U.K. team from 1996 to 2004. He has also worked at Credit Suisse Asset Management and LV Asset Management. Michael has a Masters in Business Administration from Cranfield School of Management.

How to Invest

TB Chawton Global Equity Income is available as an OEIC and it is also suitable to include in stocks and shares ISAs and SIPPS. You can buy shares in the fund by visiting www.tbaileyfs.co.uk/funds or through various third parties including Hargreaves Lansdown, James Hay, Aegon, Transact, Barclays Wealth and AJ Bell.

Ten Largest Holdings (% of NAV)

Next plc	4.6%
Procter and Gamble	4.0%
RELX	3.7%
Costco	3.7%
SEB (Enskilda)	3.6%
Texas Instruments	3.6%
Microsoft	3.4%
ASML	3.3%
Rentokil	3.3%
L'Oreal	3.2%

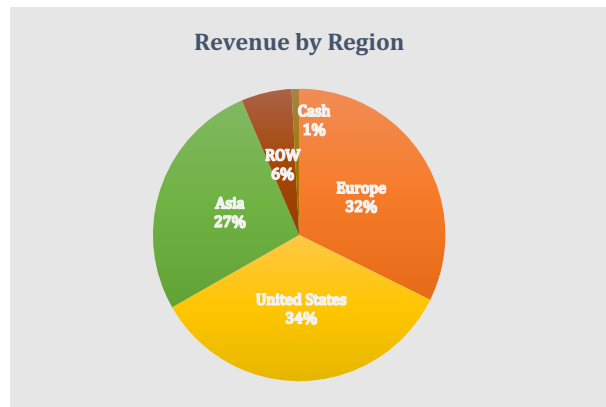

Risks

As a concentrated equity portfolio of typically less than 50 stocks the fund may involve higher volatility and therefore higher risk for those with shorter term investment time horizons (under 5 years). The value of an investment and the income from it can fall as well as rise as a result of market and currency movements and you may not get back the amount originally invested. You should therefore regard your investment as long term. Details of the risk factors are included in the fund's prospectus available at www.tbaileyfs.co.uk/funds

Portfolio Fundamentals

I set out the portfolio aggregate current fundamental characteristics below compared to the data just after inception. Characteristics remain consistent with a high-quality portfolio.

Portfolio Fundamentals	31 October 2021	30 June 2019
Return on Capital	17%	18%
Gross Margin	53%	56%
Operating Margin	25%	28%
Net debt/EBITDA	1.0	1.1
Dividend 5 year CAGR	12%	12%
Forward Price Earnings Ratio	24.4	19.4
Forward Dividend Yield	1.9%	2.2%

Source: Capital IQ/Chawton Global Investors LLP

An interesting way of thinking about the valuation is to invert the forward PE ratio to get an earnings yield for the portfolio of 4.1% which compares favourably to current yields from cash and bonds. In addition, the companies held in the fund should be able to increase prices in line with inflation in which case capital value and income are likely to be preserved in real terms (but see risk warnings above). Returns are then further augmented by growth from reinvestment of earnings not distributed.

Important Information

TB Chawton Global Equity Income is a sub-fund of the TB Chawton Investment Funds ICVC. Full details of the TB Chawton Investment Funds including risk warnings are published in the TB Chawton Funds Prospectus, The TB Chawton Funds Supplementary Information Document (SID) and the TB Chawton Investment Funds Key Investor Information Documents (KIIDs) which are available on request or at www.tbaileys.co.uk.
